# UnTide

Final Project Presentation
CS160-03 Spring 2025
Professor Abucejo
Team 4:
Daniel Ly, Daniel Chukhlebov, Benjamin Ha,
Brianna Rogers

- Our Team -

Daniel Ly - Backend Integration, Post UI
Brianna Rogers - Main Page UI, Map/Location Integration
Benjamin Ha - Feature Set
Daniel Chukhlebov - Documentation, Cross-Platform Testing

What is UnTide?

Our inspiration:

The ocean covers 70% of Earth's surface and supports over 2 million species.

It plays a vital role in climate regulation, food supply, and energy.

Ocean health is under threat from climate change, pollution, and overfishing.

Protecting the ocean requires collective, multi-faceted efforts.

UnTide was created to help enable normal people to address one factor: physical pollution.

What is UnTide?

UnTide is a social media bulletin site for volunteers to gather at beach cleanup events:

- Crowd source cleanup efforts
- Organization-led event registration
- Users can also create events
- Support for attendees with food/drinks

UnTide allows corporations and organizers have the opportunity to incentivize cleanup events
- Lower costs for them
- Freebies for us

Come Try our App!

Please go to https://untide.vercel.app/sign-in,
(or use the link sent in #General on the class Discord server)

- Create a user account using your SJSU email

- Explore the app, edit your profile, create an event post if you would like!

- We will check the newly made events after the demo

UnTide Demo

Let's Check In and See How Those New Posts are Coming Along!

Conclusion

- UnTide provides a platform for individuals and organizations to organize beach cleanup events

- UnTide uses a bulletin-style format for ease of use

- Event organizers are encouraged to bring snacks, food, drinks, and freebies/merch as a reward

- Both users and official organizations can use UnTide

Thanks for Listening!

We're Happy to Dive Deeper and Answer any Questions in the Q&A Segment!
